

tables

for behavioral health

bh tables

Our collection of heavy-duty tables for Behavioral Health includes multi-purpose tables, occasional tables and drum tables. This new offering is a result of our growing experience in working with behavioral health facilities to find furniture solutions that are suitable for use in demanding environments. Multi-Purpose table bases are weighted for increased safety and tops are 1" thick with a solid wood bullnose edge, rounded to eliminate sharpness. Occasional Tables feature thermoformed tops with rounded edges and sled bases that provide bolt-to-floor option. The Drum Table offers a weighted steel plinth base for extra protections against damage and to discourage mishandling. A wide range of standard laminate and powder coat finishes are available, plus custom sizes may be specified to meet specific needs.
