Stance Healthcare is a Symbol of Strength in healthcare furniture manufacturing. Our products maintain a level of durability that goes above and beyond what is typically expected of healthcare furniture. All Stance seating, tables and case goods are designed and built to exceed the demands of rigorous 24/7 healthcare environments. Some may consider this over-engineering. We prefer to call it exceeding expectations, and we make this statement of quality on all of our products.

Stance Healthcare is a family business that takes pride in building furniture that you can depend on for years to come. The healthcare sector is tough on furniture, and Stance rises to the challenge with a show of strength.
