

JENSEN METAL SEATING CONSTRUCTION –

- Fully-welded chair frame is constructed of 14 gauge 1 ¼" x 1 ¼" steel tubing, and 1/8" and 3/16" thick formed steel components and powder coated for long life.
- Contoured back panel is constructed of laminated, high density hardwood veneers using a RF process and a UF resin with very low off-gas emissions
- Plywood seat panel is covered with a hytel elastomer composite that retains its original shape for long life and enhanced comfort
- Foam contains enviromental-friendly bio-based materials, and is California TB117-2013 compliant. Hi-resiliency foam resists flattening for longer life and enhanced comfort
- Optional polyurethane arm caps are self skinning (ISKIN) foam overmolded on a steel insert. These arm caps are treated with an antimicrobial agent for healthcare applications, and may be disinfected with diluted hydrogen peroxide, alcohol and bleach solutions
- European Beech arm caps are 5 axis CNC machined, then sanded with 220 grit paper for an extra smooth finish

FEATURES –

- Fully welded design ensures long-term structural integrity
- Brazed frame welds provide a clean aesthetic
- Available in 3 seat widths: 21", 24" and 31"
- Seat, back and arm caps can be easily replaced if necessary
- Wall-saver frame design protects walls from damage

OPTIONS –

- Choice of wood, polyurethane or solid surface arm caps
- Contrasting fabrics
- Custom finishes
- Choice of open or closed arms
- Moisture barrier
