

These instructions may be used to disassemble all versions of our Onward Lounge seating line including our standard, midsize single, double and triple standard and midsize seating configurations, as well as our bariatric model.

Time Required:

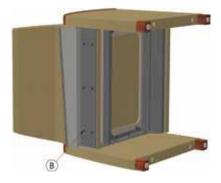

15 minutes per single chair. We recommend assistance with the double and triple seat configurations.

Tools Required:

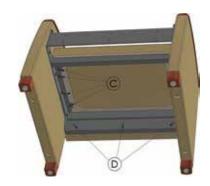

All models: #2 Philips screwdriver, pliers, knife (preferably a box cutter) and a 3/8" ratchet with 7/16" socket.

A: Separate the Velcro® at the bottom of the seat back cover to reveal the fasteners attaching the seat back to the frame.

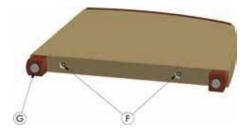

B: Using a Philips screwdriver remove the back(s) (six screws each).

C & D: Using a #2 Philips screwdriver, remove seat cushion from the seat frame.

E: Using a #2 Philips screwdriver, remove the end frame and seat extension from the seat frames. On double or triple seat configurations you will need to do the same with the center arms. Place the seat frame and seat extension to one side.

F: If equipped, remove the optional wood or polyurethane arm cap from each end frame by unthreading the two 1/4 - 20" nuts recessed in the underside of the frame, using a 3/8" ratchet with 7/16" socket. Now pull straight up on each arm cap until the threaded rods securing the arm caps are free of the end frame. Repeat with the other end frame(s). Use pliers to unthreaded the rods from each arm cap.

G: Using pliers, remove each glide (two) from each end frame.

Upholstery and Foam Removal

Chair Back

Using a knife, carefully cut the upholstery next to the staples securing the upholstery to the wood panel. Next, take a knife (preferably and box cutter) and carefully slice the foam away from the wood back panel. Remove the fabric and foam.

Chair Seat

Using a knife, carefully cut the upholstery next to the staples securing the upholstery to the bottom wood seat panel. Remove the fabric and then take a knife (preferably a box cutter) and carefully slice the foam away from the wood panel.

Material Breakdown

Quantity	Component	Material
	Seat Frame	Steel 🚺
	Seat Frame Extension	Steel 🚺
4	Glides	Steel/ Nylon
2	Seat and Back	Foam
2	Seat and Back Panels	Plywood
2	Arm Caps (Optional)	Wood
2	Arm Caps (Optional)	Polyurethane
Various	Fasteners and Staples	Steel

End of Life Recovery OptionsProduct Line: Onward Guest, Onward Lounge, Boardwalk, Vista
