

Terrace BH Series – TET/B 4/6 H/S

Product Documentation

This document includes:

01 End of life and Recovery options

Disassembly Instructions

Terrace BH Series – TET/B 4/6 H/S

Time Required: Approximately 5-10 minutes

These instructions may be used to disassemble all models and configurations in the Terrace BH Series.

Step 1

*If the unit is bolted to the floor, remove all 4 bolt to floor fasteners, if not proceed to step 2.

Step 2

Flip the table/bench over onto its top

Tools Required

Power Drill

Ratchet Wrench w/ Tri Groove Socket

Pin-In-Torx Bit

Step 3

Remove all exposed screws on the underside of the seat/ table frame.

Steel Option

HDPE Option

*The number of screws will vary depending on the size of the unit and seat / table top option (HDPE or Steel) .

Step 4

Using the ratchet wrench remove the 4 tri groove nuts on each side of the unit.

Disassembly Instructions

Terrace BH Series – TET/B 4/6 H/S

Step 5

Remove the end frames and end frame caps on each side of the unit.

Step 6

Remove the deck frame from the table top / seat surface.

The unit is now fully disassembled and the individual components are ready for end of life procedures.

Material Breakdown

Terrace BH Series – TET/B 4/6 H/S

Number	Quantity	Component	Material
1	2	End frame	Steel 
2	1	Deck frame	Steel 
3	2	End frame cap	Steel 
4	1	Seat top (optional)	Steel 
5	1	Seat top (optional)	HDPE 
6	1	Table top (optional)	Steel 
7	1	Table top (optional)	HDPE 
8	Various	Staples and Various Fasteners	Steel 

End of Life Recovery Options

Terrace BH Series – TET/B 4/6 H/S

Identification of Materials		Material Recovery Opportunities		
Material	Example Components	Recycling Note	Higher Value Opportunity	Lower Value Opportunity
Please visit www.recyclingmarkets.net to find a recycling outlet nearest to you				
Plastic				
High Density Polyethylene (HDPE)	Seat top / Table top (optional)	Actively recycled into raw polymer by industrial plastic recyclers. It is important to note, however, that recycled plastic markets are highly variable and acceptance of a given material fluctuates based upon multiple factors (e.g. material type, quantity, presence of contaminants, markets for that material, etc.). Recycling value is improved with greater quantities and accurate material identification (i.e. identified by base polymer, filler, and additive content)	Recycled HPDE Regrind	Mixed Thermoplastic Compression Molding
Metals - Ferrous (e.g. Steel, Iron)				
Steel	End frame, End frame caps, Deck frame, Seat top /Table top, Fasteners	Actively recycled into raw ferrous metal ingot. Ferrous metals are easily separable from other materials through shredding and magnetic separation. Therefore, many metal recyclers will accept ferrous metals which contain small amounts of mixed materials (e.g. plastic, aluminum).	Recycled Steel Ingot	Off Grade Ferrous Ingot
